

GRADUATION RATES

In accordance with Student Consumer Information; and in accordance with Federal Student-Right-to-Know regulations, West Virginia Junior College is required to make its graduation rates available to prospective and current students.

This rate is calculated using the Fall 2006 Cohort of First Time Never Attended Before, Degree or Certificate seeking students as reflected on the institution's most recent IPEDS report. The graduation rate represents the percentage of students from that cohort which successfully graduated within 150% of their normal program length. The institution does not produce a transfer out rate.

These rates are available and can be requested from the Campus Director.
